

ROCKY FLATS ENVIRONMENTAL TECHNOLOGY SITE REGULATORY CONTACT RECORD

Date/Time: 09-29-04 / 10:00

Site Contact(s): Randy Leitner, Jay Britten, Steve McNitt
Phone: 303-966-3537

Regulatory Contact: Denise Onyskiw
Phone: 303-966-6687

Agency: CDPHE

Purpose of Contact: Discuss plans for Room 3813 drain pipe removal

Discussion

Two process drain trenches located in B374, Room 3813 currently are lined with a stainless steel covering and are located in the floor of Room 3813. One trench is longer (approximately 8 feet) and contains no process drain piping. The second trench is smaller (approximately 2 feet) and contains a process drain vent and pipe leading to the concrete foundation and continuing through the concrete slab to Room 2804 tank farm. For purposes of Pre-Demolition Survey, the process drain vent will be removed from the smaller trench, and the open end of the process drain piping located in the slab will be grouted shut. The stainless steel lined trenches will be cleaned appropriately to free release levels and surveyed at one hundred percent. Since these trenches were originally lined with stainless steel, no surveys will be conducted below the stainless steel. Inspections of the stainless steel have been conducted to ensure no penetrations exist. Therefore, no contamination is expected below this stainless steel. The remaining process drain piping in the slab/foundation will be removed during demolition as Surface Contaminated Object waste. This approach will be specifically addressed in the Pre-Demolition Survey Report for Room 3813.

Ms. Onyskiw agreed with this approach.
